gdashua@mail.com

[Gamey001](#)

CORE COMPETENCIES

- ★ GitHub, GitLab, CI/CD workflows
- ★ Docker, Webpack, npm, yarn
- ★ React (TypeScript), Material UI, Responsive Design, Internationalization (react-intl) Internationalization (react-intl)
- ★ Java (Spring Boot, Spring Web, JPA), Node.js/Express, Ruby on Rails, Python (Django)
- ★ RESTful APIs, OAuth2, OpenID Connect
- ★ Amazon Web Services (AWS), performance tuning, deployment automation
- ★: Bootstrap/PHP/MySQL, Drupal
- ★Testing & Quality Assurance: Unit testing, regression testing, code reviews, linting & style enforcement

EDUCATION

BACHELOR'S DEGREE
University of Jos, Nigeria
2012 – 2016

CERTIFICATION

Hatchways Career Accelerator Program
Aug 2021 – Oct 2021

PORTFOLIO PROJECTS:

[CHAT APP](#), [USER DASHBOARD](#), [SITE STUDENTS PROFILES](#)

PROFESSIONAL PROFILE

Dedicated and well-trained **Full Stack Web Developer** with 4 years of programming experience, including 2 years as a **Backend Java Spring Boot Engineer** supporting and enhancing backend systems. Skilled in designing and consuming high-quality, reliable APIs. Successfully completed the **Hatchways Career Accelerator Full Stack Training Program** (simulated Agile team environment) with excellent results. Experienced with **Figma** and **Adobe XD** for UI/UX design, with strong adaptive and responsive design capabilities.

PROFESSIONAL EXPERIENCE

JAVA SPRINGBOOT/REACT DEVELOPER

JAN 2024– PRESENT

Data.FI, Palladium International/Abuja Nigeria

- Enhanced company's EMR (Lamisplus) UI's using **React (TypeScript)**, **Material UI**, and various react related libraries.
- Designed and developed **RESTful web services** with **Java Spring Boot**.
- Implemented robust client- and server-side input validation using **Yup** and **javax.validation** libraries.
- Developed and maintained **unit and regression tests** to ensure code reliability.
- Conducted **web service tuning and performance testing** to optimize system efficiency.
- Contributed to **technical strategies, solution architecture, and design** across multiple technologies.
- Utilized **Formik** for effective form state management.
- Refactored UI code, removing redundancies and improving maintainability.
- Participated actively in **code reviews**, providing and receiving constructive feedback.
- Applied **design principles and software patterns** to deliver scalable, enterprise-level solutions.
- Leveraged techniques such as **object destructuring** and consistent **code formatting** to produce cleaner, extensible codebases.

REACT/TYPESCRIPT DEV. (REMOTE)

MARCH 2023 – SEPT 2023

Logbookie.eu / Praha Czech Republic

- Enhanced the company's mobile site UI using **React (TypeScript)** and **Material UI**.
- Refactored multiple codebases to improve maintainability and performance in pre-existing projects.
- Implemented **UI list virtualization** with the **react-virtualized** library for efficient rendering of large datasets.
- Applied **react-intl** to support internationalization, including Czech-to-English translations.
- Integrated **Axios** to consume company APIs and streamline data handling across features.
- Managed complex form states (e.g., edit profile, login, password recovery) using **Formik**.
- Developed a **ProtectedRoute** component to enforce client-side authentication.
- Built **token renewal functionality** to refresh user sessions securely.
- Configured the code editor to align with company **linting rules and style guidelines**, ensuring consistent, clean code.
