CORE COMPETENCIES

- GitHub, GitLab, CI/CD workflows
- Docker, Webpack, npm, yarn
- React (TypeScript), Material UI, responsive design
- Internationalization (react-intl)
- Java (Spring Boot, Spring Web, JPA)
- Node.js / Express
- Ruby on Rails, Python (Django)
- RESTful APIs, OAuth2, OpenID Connect
- AWS, performance tuning, deployment automation
- Bootstrap, PHP, MySQL, Drupal
- Unit & regression testing, code reviews, linting

EDUCATION

BSc, University of Jos

Nigeria · 2012 – 2016

CERTIFICATION

Hatchways Career Accelerator

Full-Stack Program · Aug – Oct 2021

PROFESSIONAL PROFILE

Dedicated full-stack developer with 4+ years of production programming experience, including 2 years as a backend Java/Spring Boot engineer supporting and extending enterprise systems. Skilled in designing and consuming high-quality, reliable APIs and in building polished React/TypeScript front ends. Graduate of the Hatchways Career Accelerator Full-Stack Training Program (simulated Agile team environment). Experienced with Figma and Adobe XD for UI/UX, with strong adaptive and responsive design capabilities.

PORTFOLIO PROJECTS

WhisperBox — Chat App

End-to-end encrypted messaging · React, TypeScript, Web Crypto API

E2EE messaging client where plaintext never leaves the browser. RSA-OAEP-2048 + AES-GCM-256 with password-derived key wrapping via PBKDF2.

LIVE incomparable-churros-927646.netlify.app

CODE github.com/Gamey001/chatty-messge-app

Invoice Manager

Offline-first invoicing · React, IndexedDB, TypeScript

Responsive invoice management app with client-side persistence via IndexedDB. Create, edit, filter, and export invoices without a backend — fast, durable, and installable.

LIVE inspiring-boba-3545a8.netlify.app

CODE github.com/Gamey001/invoice-app

User Dashboard

Random users, real UX · React, REST APIs

User-directory dashboard that consumes a public REST API and filters results through a richly considered interface — pagination, search, and crisp empty/loading states.

LIVE gamalfb.netlify.app

Students Profile

Performance tracker · React, JavaScript

React app that tracks students' performance across courses with sortable tables, filtering, and quick-glance summary cards.

PROFESSIONAL EXPERIENCE

Java Spring Boot / React Developer

Jan 2024 – Present

Data.FI, Palladium International — Abuja, Nigeria

- Enhanced the company's EMR (LAMISPlus) UI using React (TypeScript), Material UI, and supporting libraries.
- Designed and developed RESTful web services with Java Spring Boot.
- Implemented robust client- and server-side input validation using Yup and `javax.validation`.
- Authored unit and regression tests to keep critical flows reliable as the system evolved.
- Conducted web service tuning and performance testing to optimize system efficiency.
- Contributed to technical strategy, solution architecture, and design across multiple technologies.
- Managed complex form state with Formik for consistent, predictable UX.
- Refactored UI code to remove redundancy and improve maintainability.
- Participated actively in code reviews, providing and receiving constructive feedback.
- Applied software design patterns to deliver scalable, enterprise-level solutions.

React / TypeScript Developer (Remote)

Mar 2023 – Sep 2023

Logbookie.eu — Praha, Czech Republic

- Enhanced the company's mobile site UI using React (TypeScript) and Material UI.
- Refactored multiple codebases to improve maintainability and performance in pre-existing projects.
- Implemented list virtualization with `react-virtualized` for efficient rendering of large datasets.
- Applied `react-intl` to support internationalization, including Czech-to-English translations.
- Integrated Axios to consume company APIs and streamline data handling across features.
- Managed complex form states (edit profile, login, password recovery) with Formik.
- Developed a `ProtectedRoute` component to enforce client-side authentication.
- Built token-renewal functionality to refresh user sessions securely.
- Configured the editor to align with company linting rules, ensuring consistent, clean code.
